💼 EMPLOYMENT HISTORY

Programmer
April 2024 - June 2024

KOOM CORPARATION COMPANY LIMITED

Worked on maintaining and debugging legacy systems built with Node.js, PHP, and HTML.
Fixed critical bugs across internal frameworks used by the company.
Implemented new features based on requirements from team leads and product owners.
Collaborated with cross-functional teams to enhance system reliability and usability.

Software Engineer
2021 - March 2024

THE GANG TECHNOLOGY

Developed user interfaces for web applications, implemented new features, and maintained existing ones.
Worked as part of an Agile/Scrum team and collaborated closely with backend developers and QA engineers.
Built applications using AngularJS, Vue.js, and worked with tools like Jira and Docker.

Web Developer
December 2019 - 2021

Freelance

Developed promotion websites and landing pages using Angular.
Integrated web scraping for data processing and managed Linux servers on Google App Engine.
Tech Stack: HTML, PHP, MySQL, Node.js, Angular, TypeScript, jQuery, Bootstrap

Full Stack Developer
October 2016 - December 2019

JAMidea Co., Ltd.

Built a real-time web app for managing production tasks in an automotive carpet factory.
Employees log in to view and update their tasks across stages like cutting, sewing, QC, and packaging.
Implemented Socket.IO for seamless real-time updates.
Tech Stack: HTML, CSS, JavaScript, AJAX, jQuery, Node.js, Socket.IO, PHP, MySQL

Backend Developer
October 2014 - April 2016

Click Connect Co.,Ltd

Developed and maintained web services and APIs to support mobile applications.
Notable projects include "Game Show Social" and "Samitivej Trackcare", both providing backend APIs for real-time app functionality.
Tech Stack: PHP, MySQL, HTML, CSS, Bootstrap

Full Stack Developer
June 2013 - May 2014

YES I AM Innovation (Synature Group Co.,Ltd.)
